

入門課題その2 解答例

```
@Test
public void test() {
    .....
    driver.get(url);

    WebElement okButton
        = driver.findElement(By.id("ok_button"));
    okButton.click();
}
```

入門課題その3 解答例

```
@Test
public void test() {
    .....
    driver.get(url);

    WebElement subject
        = driver.findElement(By.id("subject"));
    subject.clear();
    subject.sendKeys("Selenium");
}
```

入門課題その4 解答例

```
@Test
public void test() {
    .....
    driver.get(url);

    WebElement onRadio
        = driver.findElement(By.id("on_radio"));
    onRadio.click();
}
```

入門課題その5 解答例

```
@Test
public void test() {
    .....
    driver.get(url);

    WebElement allowedCheck = driver.findElement(
        By.id("allowed_check"));
    if (!allowedCheck.isSelected()) {
        allowedCheck.click();
    }
}
```

入門課題その6 解答例

```
import org.openqa.selenium.support.ui.Select;
.....
@Test
public void test() {
    .....
    driver.get(url);

    WebElement headCount
        = driver.findElement(By.id("head_count"));
    Select select = new Select(headCount);
    select.selectByValue("5");
}
```

入門課題その7 解答例

```
import static org.junit.Assert.*;
import static org.hamcrest.core.Is.*;
.....
@Test
public void test() {
    .....
    driver.get(url);

    WebElement total
        = driver.findElement(By.id("total"));
    assertThat(total.getText(), is("9000"));
}
```
